- ✓ Belarus

MM GO EAST GMBH

About us

MM Go East GmbH is an international transport and logistics company, whose main focus is shipments to Russia and the CIS states. Along with our partners and a large network of contacts, MM Go East GmbH offers you worldwide transport solutions. Our location in Kelsterbach, very close to Frankfurt airport, means we can offer fast response times.

Our strength: CIS Airfreight

The core skills of our company are international air freight and transports to the states of the former Soviet Union. The range of services is supplemented by road freight, heavy goods transport, sea freight, customs clearance and express deliveries. Whether it is parcel shipments or project business – along with our partners we can deliver nationwide in all CIS states, regardless of the mode of transport. Our speciality is the fastest possible delivery of spare parts and tools to your customers or fitters on site. We can also look after forwarding the tools to the next location or retrieving faulty parts for you.

Our strength: Owner-operated

We are an owner-operated company and as such, are not hampered by bureaucracy, so we can react quickly. Permanent partnerships in Russia and the CIS states, some of which have been in existence for over 20 years, guarantee smooth processes. Our employees have many years of experience in Russian shipping and therefore also know all the pitfalls that can occur during an export or import shipment.

Employees who have Russian as their mother tongue are also available at MM Go East GmbH to advise and assist you. This means we can also handle the communication with your customer in Russia or translate documents in order to prevent any misunderstandings and problems with the dispatch.

We hear again and again from new customers that exports to Russia and the CIS countries are so problematic. But this is not true if you work with our professionals. Our worldwide clientele has trusted our team and our reliable

and dependable service to these countries for a long time. Convince yourself that exports to these countries can be carried out easily and on schedule with the right partner at your side.

Our strength: sustainability

THINKING ECOLOGICALLY – ACTIVELY REDUCING CO₂
The issue of environmental pollution is playing an increasingly important role, particularly in the area of transport and freight traffic. We make our contribution to the sustainable use of our environment and raw materials and would like to create a regional balance.

This sees us getting involved in ecological projects, among others with HessenForst Forestry Office Groß-Gerau and planting one tree per calendar day around Frankfurt Airport, thereby actively helping to reduce CO₂ emissions.

Service overview – air transport:

- Top air cargo rates to all destination airports
- DDP service/replacement part shipping, guarantee deliveries, free subsequent deliveries etc.
- Shipping and return of assembly tools

Call us on +49 (0) 6107 40760 or send us an e-mail at request@mm-goeast.de and join us in planning the dispatching process.

DDP SHIPPING

Free domicile delivery with our DDP service

We offer a comprehensive DDP service to Russia and into the CIS states via:

- On-board courier
- Express
- Air cargo
- Special truck delivery
- Consolidated cargo truck delivery

Express shipping

Your shipment is urgent, but receipt within 1 – 2 days via on-board courier is not necessary or, due to the weight, the content or the dimensions, not capable of being delivered via on-board courier?

With MM Go East you can choose between different shipping times while using our DDP service. This enables you to save money, depending on the transit time required.

We examine all alternatives for you, choosing between the following options:

- On-board courier
- Air freight/customs clearance/on-board-courier or special trip
- Express shipping
- Air cargo
- Charter
- Special truck delivery

EVERY MINUTE COUNTS

Line/assembly standstill

Trained on-board couriers bring your urgent shipments onto the next possible scheduled flight. At the destination/airport these shipments can be customs cleared on request and delivered free domicile.

Depending on destination, our transport times varies between 12 and 36 hours.

In this way all types of goods can be transported, so far these do not breach import and export regulations or aviation regulations for passenger luggage.

The customs clearance of order goods is also possible in prior arrangement with the recipient.

ASSEMBLY TEAMS IN RUSSIA

Assembly planning in Russia

For 10 years now we have been supplying assembly teams on site with necessary replacement parts, tools and hazardous goods required for assembly, to the full satisfaction of our customers.

The choice of different transit times enables you to ensure smooth-running work assignments for your assembly and construction teams.

This means that you save time and money, as you are able to complete the plant/machine for your customers on time.

We guarantee that you will have no troublesome waiting times and delays.

In addition, we can also retrieve the required tools and faulty parts or transport the tools directly to the next assembly site.

PROJECT LOGISTICS IS TEAMWORK

Teamwork is our strength

With our project logistics business field we supply you with a complete package for your logistics requirements.

All of the specialist areas of MM Go East come together here like gear wheels, resulting in a functioning clockwork movement.

We not only offer you a transport solution from A to B but also take care of everything else relating to your assignment.

Do you need storage for your goods at the destination, or intermediate storage? Do you have special requirements before, during or after transportation?

Here at MM Go East we offer you an all-round service for your logistics project. Contact us and we will find a suitable solution for you together.

TRADE FAIR

You are planning to take part in a trade fair in Russia

The professional planning and successful realisation of a trade fair event is only possible with a logistics provider with necessary degree of expertise and competence in the respective country where the fair is to be held. Transport to the trade fair and professional handling on site is a key prerequisite for this. Combining and planning this with you to ensure that your trade fair event leads to the desired success is our goal.

We take care of the complete fair event, or merely focus on the supply or follow-up delivery of consumables. Experience shows that this is an area where complications often arise with other logistics companies, and there is a nasty surprise if the stand is assembled and ready but the advertising material is not available because of customs clearance issues.

Our years of experience, first-class foreign contacts and expertise as well as staff accomplished in the respective language ensure that you, as exhibitor, can focus on your actual tasks, namely a successful trade fair presence and the support of your customers.

Instead of having to welcome your customers with a temporary arrangement due to missing consumables and advertising materials or even the delayed arrival of the fair stand itself.

AIR CARGO

Shipping with or without forwarding to the recipient

We offer you top conditions for air freight shipping to all destination airports into the CIS states.

In addition, we can also use air freight to serve destinations such as Norilsk, Vladivostok, Komsomolsk, Khabarovsk or the island of Sachalin, which are almost impossible to reach by truck.

Deliveries from the airport to the recipient are also possible, regardless of whether these have cleared customs or are dutiable goods.

A cost-benefit analysis is drawn up for each offer to determine whether it is advantageous (or cheaper) for our customer to transport the shipment by truck.

TRUCK

ROAD TRANSPORT OF ALL KINDS INTO THE CIS STATES

We offer you consolidated cargo and direct transport via truck from Germany and Europe into the CIS states, at reasonable conditions.

We are also able to arrange special transport and project logistics. A cost-benefit analysis is drawn up for each offer to determine whether it is advantageous (or cheaper) for our customer to transport the shipment by air.

Our services:

- One-stop service, beginning with planning and cost optimisation, as well as the realisation of the actual transport of large machinery
- Assembly lines or site relocations on all possible transport options via road, air and sea
- Support of the supply chain during a project with options for storage, packing, order picking and shipping
- Rail
- Truck/Special transport/Special trips/Grouped cargo
- Air cargo
- Charter
- Express and on-board courier/emergency logistics

Our dedicated, bilingual and experienced team deals with every challenge that the realisation of your cargo project brings with it.

MM Go East – we guarantee timely delivery.
